

# Diabetes Research and Clinical Practice

## Aims and Scope

*Diabetes Research and Clinical Practice* is an international journal for healthcare providers and clinically oriented researchers that publishes high-quality original research articles and expert reviews in diabetes and related areas. The role of the journal is to provide a venue for dissemination of knowledge and discussion of topics related to diabetes clinical research and patient care. Topics of focus include translational science, genetics, immunology, nutrition, psychosocial research, epidemiology, prevention, socio-economic research, complications, new treatments, technologies and therapy. *Diabetes Research and Clinical Practice* is the official journal of the International Diabetes Federation.

Please submit manuscripts online at <http://ees.elsevier.com/diab>
